Beautiful, Durable and Contemporary Design for Any Home
Sliding Patio Door

The Kensington Sliding Patio Door is an attractive way to extend your room’s ambiance and bring the outside view into the home. Each door is custom made with the finest quality and craftsmanship for maintenance free enjoyment.

Available in interior colors of white, tan or wood laminates and exterior solid colors of white, tan, five standard exterior colors or the option of your own custom colors, the Kensington Sliding Patio Door is offered in a 2-, 3-, or 4-lite configuration. Every model is engineered with twin-tandem, bottom-mounted rollers on a state-of-the-art monorail system allowing for a smooth opening and tight closure.

Two unique features – made standard on every door – are the heavy-duty aluminum screen frame with fiberglass screen cloth and tempered glass. We believe that safety, as well as energy efficiency, should not be compromised.

Nothing is more enjoyable than a sliding patio door leading to the outdoors. In recent years, the patio door has evolved from a functional access way to the outside and has transformed into a focal point of the home. As a result, a larger selection of styles, colors, accessories, and energy-efficient glass options have become extremely important. Kensington’s Sliding Patio Doors allow the designer in you to come alive with a variety of options – from high performance glass systems to grille styles and woodgrain interior laminates.

In addition to the base colors of white and tan – which blend easily with any décor – our “ColorScape” option has five custom exterior colors available that allows you to customize the exterior of the door. We also offer custom colors. Our exterior ColorScape choices will truly enhance the “curb appeal” of your home.

Custom sizes available
The Kensington Sliding Patio Door is designed for optimum performance as well as lasting, weather-resistant beauty. All doors are engineered with a continuous interlock and multi-point locking mechanism for enhanced security. The elegant hardware styles are available in finishes that will enhance any style décor.

**Features**

- Fusion-welded sash panels
- Elegantly sculpted frame and sash
- Optional matching transoms and sidelites available
- Gliding monorail screen track for easy operation
- Sash is structurally reinforced with aluminum bars for maximum strength
- Rugged extruded aluminum sill designed to resist heavy traffic
- Heavy duty rollers for smooth operation
- Available in 2-, 3-, and 4-lite configurations
- Meets or exceeds the standards of the American Architectural and Manufacturers Association (AAMA)
- Multi-point locking handle set

From the outside, a key lock is provided on the locking handle for maximum security.

**Side Adjust Tandem Rollers**

Side Adjust Tandem Rollers feature radial ball bearings that are manufactured by Truth Hardware to provide the highest quality assemblies. Machined from high-quality solid steel, Truth’s bearing raceways are heat-treated and plated for wear and corrosion resistance. This method produces long-lasting true running rollers capable of carrying the heaviest loads. Wheels are offered in various diameters with a choice of steel, stainless steel or nylon rolling surfaces.
Safety & Security Meet Beauty and Functionality

Nexus™
LOCK SYSTEMS

Distinctive Styling To Complement Any Patio Door.

Multi-Point Lock System
The Nexus Multi-Point Lock System which is offered in stainless steel as a standard, has three individually adjustable locking points with opposing upper and lower lock points to prevent the door from being lifted which further enhances its security. A greater adjustment range at the remote hooks provides the additional forgiveness needed on doors which may be out-of-square due to poor installation.

STANDARD & EXTENDED REACH: The Nexus Locking System has two options for the lock, standard and extended reach, which each have a horizontal adjustment feature built into them to offer additional forgiveness.

INDUSTRY TESTED: The Nexus Lock Systems have been built to help customers meet the AAMA and CAWM forced entry requirements. The Nexus Two-Point System can exceed 2,800 lbs. of pulling force and the Multi-Point System exceeds 3,000 lbs.

KEEPERS: Truth realizes that no two door systems are exactly alike; therefore we have designed multiple keeper options to accommodate your application. In addition, a special “keeper locator” makes the installation of the keeper virtually fool proof.

ANTI-SLAM FEATURE: Truth’s “anti-slam” feature prevents potential damage to the door or locking system hooks by not allowing the hooks to be extended unless the door is closed against the frame. This feature ensures that when the lock is operated it is close enough to properly engage the keeper avoiding a “false” sense of lock up.
Swing Patio Door

The superior construction and craftsmanship of the Kensington HPP Swing Patio Door adds beauty and elegance to the home while providing the energy efficiency you demand. This multi-paned door is available in either a single (garden) or double (French) configuration in either ‘in’ or ‘out’ swing. With double strength insulated glass included as standard, either a Low-E/Argon or a high performance glass system is available.

The in-swing opens into your home creating an expansive airy feeling, while the out-swing is a portal to bring nature’s panorama into your home.

Kensington swing doors are built for years of performance and available in several colors as well as custom exterior colors.

Companions – Choice of matching sidelites and transoms

Glazing – High performance glass options

Woodgrain – White door woodgrain interior available in cherry and light oak
Beige door woodgrain interior available in light oak

Hinge Technology
Through the lifetime of any door, the components most susceptible to failure are the hinges. The Kensington HPP door is manufactured with hinges that are not only adjustable but carry a lifetime guarantee. This feature protects your investment, and assures a quality installation that also allows for adjustments should your home settle over time.

Eight Reasons Our Quality Is Superior

1. 1” insulated tempered glass system gives the door superior insulation and sound-deadening properties.
2. Fusion-welded panel and frame corners create strong unitized components that prevent air and water infiltration.
3. 4-9/16” Frame with aluminum reinforced frame, sash, astragal and mulls creates rigidity plus the wear-resistant anodized aluminum sill cover stands up to the worst traffic area in the home.
4. Internal weeping system and a 15-degree sloped sill efficiently divert water away from the home.
5. High performance weather seals keep the weather on the outside.
6. Multi-chambered, maintenance free vinyl profiles are impervious to water, air pollution and normal weathering affects. Never paint or stain your door again.
7. Stiles are fully reinforced with engineered box beams for stability and a lifetime of durability.
8. Multi-point lock gives you the ultimate in security and weather resistance.
Options and Colors

Interior Colors
The color of our vinyl sash and frame is solid throughout – so it will never chip, peel, or need to be painted. Available in base colors of white or tan, our windows will beautifully compliment any decor. You can choose an optional “ColorScape” exterior finish or your own custom color. See below for color options.

Maintenance Free Interior Wood Grain Laminates*
Entry doors experience high traffic use. Our realistic wood grain laminates offer the look of real wood with the added benefit of durability and scratch resistance. Give your doors the look of real wood – without the maintenance headaches – with natural wood grain laminates. Available in three options: cherry, light oak and pecan. *Woodgrain is not available on ANY swing doors.
